PROFESSIONAL SUMMARY

Experienced Flutter Developer with 4+ years of hands-on experience building scalable cross-platform mobile applications. Skilled in writing clean, maintainable code and collaborating in agile teams to deliver high-quality user experiences. Strong focus on performance, architecture, and continuous improvement

EDUCATION

Manipal University Jaipur

Bachelor of Computer Applications

Pursuing online BCA with coursework in programming, databases, operating systems and cloud computing.

NTTF

3 Years of Diploma In Computer Engineering

EXPERIENCE

App Station

09/2024 – Present

Flutter Developer

- Developed Khadoom, a cross-platform Flutter Mobile & Web application for the Qutar Olympic Committee
- Implemented Clean Architecture for scalability and maintainability
- Used Riverpod for efficient and predictable state management
- Built responsive and reusable UI components optimized for Flutter Web
- Integrated REST APIs and managed data flow across layers
- Implemented features such as leave requests, approvals, and internal workflow management

Active Lobby

10/2022 – 09/2024

Flutter Developer

- Developed LM Pay, a Flutter Web & Mobile money exchange application
- Enabled international remittance from UAE to multiple countries with multi-currency support
- Implemented MVVM architecture for clean separation of UI, business logic, and data layers
- Used Provider for efficient state management
- Built responsive, reusable UI components for web and mobile
- Integrated REST APIs for transactions, exchange rates, and user operations
- Focused on performance, security, and scalable code practices

Flutter Developer

- Developed an internal Flutter mobile application for blood donation management
- Implemented donor registration, blood group filtering, and request workflows
- Used Firebase (Authentication, Firestore/Realtime DB, Notifications)
- Applied Provider for efficient state management
- Built clean, responsive, and reusable UI components
- Ensured secure and reliable data handling for internal organizational use

PROJECTS

Khadoom

Developed Khadoom, a cross-platform Flutter Mobile & Web application for the Qatar Olympic Committee to manage key internal operations including leave requests, leave balances, delegations, and grievance submissions etc

LM Pay

Contributed to the development of LM Pay, a cross-border digital remittance platform that allows users in the UAE to transfer money to multiple countries quickly and securely. Supported features such as user onboarding, transaction processing, compliance workflows, and payment tracking.

Shop Ledger

Shop Ledger is a modern mobile application designed to simplify and digitize daily shop operations. It helps shop owners efficiently manage sales, purchases, expenses, credits, debits, customers, suppliers, and stock, all in one place.

Spendly

Developed Spendly, a smart expense tracking application that helps users monitor spending, set item/category-specific budget limits, and receive alerts when approaching or exceeding those limits. The app provides detailed graphical insights and analytics to help users understand their spending patterns and improve financial planning.

Flow Tracker

Developed Flow Tracker, a menstrual cycle tracking app that enables women to log their monthly periods, predict upcoming cycle dates, and receive timely reminders. The app focuses on convenience and health awareness through simple tracking and notification features.

Blood Donation Application

Built a Blood Donation application for an organization using Flutter, Provider for state management and Firebase for authentication and real-time data handling.
