

STIBIN AUGUSTINE

Flutter Developer | Mobile & Web Application Engineer

stibinaugustine3047@gmail.com | +971 58 308 1024 | Bur Dubai, UAE | [stibin.online](#) | Visit Visa – Available Immediately

PROFESSIONAL SUMMARY

Results-driven Flutter Developer with 4+ years of hands-on experience delivering scalable cross-platform mobile and web applications across fintech, GovTech, and enterprise domains. Proven track record building production-grade apps for the Qatar Olympic Committee and UAE-based international remittance platforms. Proficient in Clean Architecture, state management (Riverpod, Bloc, Provider), REST API integration, Firebase, Supabase, and agentic AI-powered coding workflows. Experienced in Next.js and Vue.js for web development. Based in Dubai and available to join immediately.

TECHNICAL SKILLS

Languages	Dart, JavaScript, TypeScript
Frameworks	Flutter (mobile & web), Next.js, Vue.js
State Mgmt	Riverpod, Bloc, Provider
Architecture	Clean Architecture, MVVM, MVC
Backend / BaaS	Firebase (Auth, Firestore, Realtime DB, FCM), Supabase
APIs & Data	REST APIs, JSON, API integration & data-flow management
UI / UX	Responsive design, reusable component libraries, Flutter Web optimization
AI / Agentic	Agentic coding workflows, AI-assisted development, prompt engineering
Tools & DevOps	Git, GitHub, VS Code, Postman, Figma

PROFESSIONAL EXPERIENCE

App Station (Subsidiary of Applab, Qatar)

Flutter Developer

Sep 2024 – Feb 2026

Qatar (Remote)

- Architected and delivered Khadoom, a cross-platform Flutter Mobile & Web application for the Qatar Olympic Committee (QOC), streamlining internal HR operations including leave requests, approvals, delegations, and grievance management for committee staff.
- Implemented Clean Architecture (presentation / domain / data layers) to ensure scalability, testability, and long-term maintainability of a complex enterprise codebase.
- Adopted Riverpod for predictable, reactive state management, reducing UI-related bugs and improving developer productivity.
- Built a library of 30+ responsive, reusable UI components optimised for both Flutter Mobile and Flutter Web, cutting feature development time by approximately 25%.
- Integrated multiple REST APIs and engineered robust data-flow pipelines across architecture layers, ensuring reliable data consistency throughout the application.
- Collaborated in an Agile (Scrum) team, participating in sprint planning, code reviews, and daily standups to deliver features on schedule.

Active Lobby

Flutter Developer

Oct 2022 – Sep 2024
Kerala, India (Remote – UAE Clients)

- Co-developed LM Pay, a Flutter Web & Mobile cross-border remittance platform enabling UAE residents to transfer funds to 10+ countries with real-time multi-currency exchange rate support.
- Implemented MVVM architecture with Provider state management, achieving a clean separation between UI, business logic, and data layers and making onboarding of new developers faster.
- Integrated payment gateway, KYC compliance, and transaction-tracking REST APIs, ensuring a secure, regulation-compliant money-transfer flow.
- Built responsive, reusable UI components for both web and mobile, maintaining visual consistency across platforms and reducing design debt.
- Applied performance optimisation techniques (lazy loading, widget caching) that improved app startup time and reduced frame-drop incidents on lower-end Android devices.
- Enforced security best practices including encrypted local storage, token refresh flows, and input validation to protect sensitive financial data.

Tazy Solutions

Flutter Developer

Jan 2022 – Oct 2022
Remote

- Built a Flutter mobile application for internal blood donation management, covering donor registration, blood-group filtering, and request workflows for an organisational user base.
- Integrated Firebase Authentication, Firestore, and Realtime Database for secure, real-time data handling; implemented Firebase Cloud Messaging (FCM) for push notifications.
- Applied Provider for efficient state management and delivered a clean, responsive UI following Material Design guidelines.

KEY PROJECTS

Khadoom – Qatar Olympic Committee App (Flutter Mobile & Web)

Enterprise HR & workflow management platform built for QOC. Features: leave requests & approvals, delegation management, grievance submissions. Stack: Flutter, Riverpod, Clean Architecture, REST APIs.

LM Pay – Cross-Border Remittance Platform (Flutter Mobile & Web)

International money-transfer app for UAE users. Features: multi-currency support, KYC onboarding, real-time exchange rates, transaction history. Stack: Flutter, Provider, MVVM, REST APIs.

QuickReceipt – Billing & Business Management App (Flutter Mobile)

All-in-one billing app with Bluetooth printer integration, inventory management, supplier & customer tracking, and business analytics dashboard.

Spendly – Smart Expense Tracker (Flutter Mobile)

Personal finance app with category-based budget limits, overspend alerts, and graphical spending analytics to support financial planning.

News Portal (Next.js Web App)

Full-featured news portal website with article listing, category filtering, search, and responsive layout. Built with Next.js and server-side rendering for SEO performance.

Portfolio Website (Vue.js)

Personal portfolio site built with Vue.js showcasing projects, skills, and contact details with smooth animations and responsive design.

Shop Ledger & Flow Tracker (Flutter Mobile)

Shop Ledger: digitises daily shop operations (sales, purchases, credits, stock). Flow Tracker: menstrual cycle tracking app with period logging, cycle prediction, and reminders.

EDUCATION

Manipal University Jaipur

2024 – 2027 (Expected)

Bachelor of Computer Applications (BCA) – Online

Coursework: Programming, Databases, Operating Systems, Cloud Computing

NTTF

Completed

Diploma in Computer Engineering (3 Years)
